A renewed commitment to community

Finding a service company you trust with your home is no easy feat. With large corporations quickly buying-up local, family-run businesses, it's no surprise so many families are finding themselves dealing with unfamiliar technicians unable to meet their unique needs.

Understanding of how frustrating unsatisfactory installations or repair work can be, Merrimack Valley Corp., who has served the area for more than 20 years, has decided to take action, and buy-back one of the area's oldest and most trusted heating and air conditioning contractors — Climate Design Systems. Founded in 1946, many of you, or perhaps even your parents, have relied on Climate Design Systems for your home heating, cooling and air quality needs. And while I can only speculate, I suspect many lost confidence in the company when it sold-out to a large corporation several years ago.

I look forward to restoring old fashioned, community-oriented values complemented by today's cutting edge technology. It is an honor to return such a well-respected name to its community roots, and it is an exciting opportunity to reunite with old and new customers alike.

Yours truly,

Buddy Thomas,

President
Merrimack Valley Corp.

"Cutting edge" provider

Climate Design Systems stays on the cutting edge of heating and air conditioning technology, and frequently leads the industry in mapping the future. Through its own custom design work, it sometimes even defines "cutting edge."

In the more than 60 years since Climate Design Systems was founded, thousands of systems have been installed and the company continues to service most of these accounts. The company's many projects reflects broad-range customer acceptance and satisfaction and include a number of high-profile residences and estates.

More than 60 years of service

Climate Design Systems, originally founded in 1946 under the name of Haverhill Sheet Metal, is a full service mechanical contractor specializing in quality heating, cooling and indoor air quality systems.

Still serving the residents of Merrimack Valley and Southern New Hampshire more than 60 years later, the company now operates as a division of Merrimack Valley Corp., a provider of commercial air conditioning and heating services as well as sheet metal fabrication.

Both companies share a 24,000 square foot facility located in Methuen and serve the Merrimack Valley, Southern New Hampshire and Greater Boston.

24-hour emergency service

To best serve customers, Climate Design Systems maintains a full-service staff of approximately 75 employees, operates a 24-hour emergency service center and utilizes 50 service vehicles.

In addition, the company provides its own design/build engineering staff, installers, service technicians, electricians and plumbers/pipefitters and offers first-rate design, installation and service.

100% satisfaction guarantee

Purchasing a home comfort system can be a difficult decision as well as a large investment. Climate Design Systems takes pride in offering you excellent quality systems and top-notch service at competitive prices. This long-term commitment to offering outstanding value is a long-standing and continuing family tradition. By choosing Climate Design Systems you may rest assured you have made a wise decision and sound investment.
